MY PROFILE

Full-stack developer with 5 years of experience, seeking opportunities to grow, improve my skills, and contribute to impactful projects.

WORK EXPERIENCE

03/2022 – Present

Full-stack developer Sinaptia

I have worked on multiple projects, contributing to both **Front-end** and **Back-end** development. My key achievements included:

- Designed an admin dashboard for user management using **React**, **Node.js**, and **AWS Lambda**.
- Developed and maintained **RESTful API** endpoints in **Node.js**, integrating them with microservices.
- Enhanced an e-commerce **Ruby on Rails** application by optimizing **SQL** queries, refactoring legacy code, and resolving performance bottlenecks, resulting in faster page loads.
- Delivered new features that improved user experience, debugged complex front-end issues, and wrote automated tests in a **React.js** application.

12/2020 – 03/2022

Front-end developer HackCTF

I designed and developed a platform for learning and practicing cybersecurity skills through interactive hacking challenges.

KNOWLEDGE

- Strong understanding of **React**, including hooks, design patterns, **Context API** and **Redux**, and **TypeScript**.
- Skilled in styling with **Tailwind CSS**, and **styled-components**; experienced with libraries such as **Shadcn** and **Material UI**.
- Knowledge of **Node.js** and **PostgreSQL**, building **RESTful APIs** with **Express.js** and **GraphQL APIs** using **Apollo Server**.
- Experienced in **end-to-end testing** with **Cypress** and **unit testing** with **Jest**.
- Hands-on experience with **AWS** services, including **Cognito**, **Amplify**, and **Lambda**.
- Solid understanding of **Git** and collaborative workflows.
- Familiar with **Agile** methodologies, particularly **Scrum** and **Kanban**.

EDUCATION

2019 – 2023
San Justo, Buenos Aires

Informatics Engineering
National University of La Matanza
Incomplete

2012 – 2018
Moron, Buenos aires

Avionics Technician
INAC-CIATA

SKILLS

– LANGUAGES
